

DEBORAH DORE

deborah.dore@outlook.com | +33 07 44 40 14 36 | Nice, France

Communication — Collaboration — Problem Solving — Time Management — Adaptability

 github.com/deborahdore  linkedin.com/deborah-dore  dblp.org/pid/414/7929

Italian NLP researcher based in France, pursuing a PhD in Argument Mining. I investigate how humans build and challenge arguments, through language or gesture, and how to teach AI to do the same.

EDUCATION

PhD - Computer Science

Nov 2024 – Nov 2027

Centre National de la Recherche Scientifique (CNRS)

Nice, France

Research Project: Argument Mining in Political Debates

Advisors: S. Villata, E. Cabrio

Keywords: NLP | Computer Vision | Argument Mining | Political Debates

Research Scholarship: EFELIA scholarship for international mobility

Master - Computer Science

Sep 2021 – May 2024

Sapienza Università di Roma. Final Evaluation: 110/110 cum laude, GPA: 4.0

Rome, Italy

Thesis: Argument Representation using Knowledge Graphs

Erasmus+ Scholarship: 6-month exchange at Universidade do Porto, Portugal

Research Scholarship: 6-month research visit at CNRS, France

Bachelor - Computer Science

Sep 2017 – Apr 2021

Università degli Studi di Torino. Final Evaluation: 110/110, GPA: 3.7

Turin, Italy

Thesis: Full-stack access control application with Spring Boot and ReactJS

Erasmus+ Scholarship: 6-month exchange at Università Tecnica din Cluj-Napoca, Romania

PUBLICATIONS

Deborah Dore, Stefano Faralli, and Serena Villata. 2025. Leveraging Graph Structural Knowledge to Improve Argument Relation Prediction in Political Debates. In Proceedings of the 12th Argument mining Workshop, The 63rd Annual Meeting of the Association for Computational Linguistics (ACL 2025), Vienna, Austria.

Pierpaolo Goffredo, **Deborah Dore**, Elena Cabrio, and Serena Villata. 2025. Repairing Fallacious Argumentation in Political Debates. In Argumentation in the Digital Society: Proceedings of the 5th European Conference on Argumentation (ECA 2025), Warsaw, Poland.

SELECTED PROJECTS

RooseBERT

 github.com/deborahdore/RooseBERT

RooseBERT is a domain-specific language model pre-trained on 11GB of political debates and speeches designed to better capture the linguistic and argumentative patterns of political discourse.

Argument Mining with KGEs

 github.com/deborahdore/political-debates-graph-analysis

We developed a hybrid approach for argument relation prediction in political debates by combining contextual knowledge from fine-tuned LM with structural information from Knowledge Graphs.

Multi-Source LMs for Audio

 github.com/deborahdore/multi-source-lms-for-audio

Leveraged a VQVAE on vector-quantized audio to improve music generation and separation.

Cross-Lingual Embeddings

 github.com/deborahdore/cross-lingual-embeddings

Created aligned embeddings for Italian and French using an encoder-decoder model in a shared latent space.

Biometric Identification with ECGs github.com/deborahdore/Know-A-Person-By-Its-Heart

Developed a biometric identification system using ECG signals from smartwatches, leveraging their uniqueness, universality, and resistance to spoofing.

EXPERIENCE

Teaching Assistant

Université Côte d'Azur, Centrale Méditerranée

Nov 2024 – Present

Sophia Antipolis, France

- Designed and delivered university courses in NLP and Data Analysis for 100+ students across BSc and MSc levels.
- Built hands-on labs and assessments covering modern NLP pipelines, NoSQL databases, and data visualization.

Research Intern

CNRS, WIMMICS Team

Sep 2023 – Feb 2024

Sophia Antipolis, France

- Fine-tuned transformer-based models for argument classification on political debate corpora, pushing state-of-the-art performance by +4% F1.
- Built and evaluated NLP pipelines for relation extraction using Knowledge Graphs and LLMs.

Software Developer

Certimeter Group (Lutech)

Jan 2021 – Aug 2021

Turin, Italy

- Designed and deployed 50+ production microservices in Spring Boot and Docker, migrating legacy monolithic systems as part of a large-scale enterprise modernization initiative.
- Built real-time data ingestion pipelines using Apache Kafka at scale.

Intern Software Developer

Certimeter Group (Lutech)

Sep 2020 – Jan 2021

Turin, Italy

- Designed and developed full-stack applications end-to-end using Spring Boot (backend) and ReactJS (frontend).

OUTREACH

Seminar Organizer

3IA Côte d'Azur - Interdisciplinary Institute for Artificial Intelligence

Aug 2025 – Present

Nice, France

Volunteer

Association for Computational Linguistics (ACL 2025)

Jul 2025 – Aug. 2025

Vienna, Austria

Student Representative

Fondazione Collegio Universitario Einaudi

Sep 2020 – Aug. 2021

Turin, Italy

SKILLS

Languages & Programming: Python, Java, JavaScript, SQL, R, C

ML & NLP: PyTorch, TensorFlow, HuggingFace Transformers, LangChain

Data & Engineering: PySpark, Apache Kafka, Spring Boot, ReactJS

DevOps & Cloud: Docker, AWS

Databases: SQL, MongoDB, ChromaDB

Documentation: LaTeX, Markdown, Git

Languages: Italian (native), English (C1 — IELTS 7.5), French (B1)
